Projects

Magic Brain | *React JS, Express JS, PostgreSQL*

- This project allows us to provide an image URL of any person and it detects the face from that image.
- Note - This Application is hosted on free version of Heroku App, thus requires 30 sec bootup time.
- Project URL: [Click here](#)

V-Chat | *React JS, Firebase*

- This project gives us a public group where we can join and chat with other members all over the world.
- Project URL: [Click here](#)

Shortest Path Finder | *React JS*

- This project helps us to visualise Dijkstra's algorithm and calculate the shortest distance between two nodes
